January 2009

**THIS AIN'T NO
SISSY GLYPHOSATE.**

**Now registered for
Roundup Ready[®] Crops!**

Breaking with tradition.

Credit[®] 45 glyphosate Beefed up. Better than ever.

Credit glyphosate has always provided proven, high-performance weed control in burndown, pre-harvest and post harvest applications.

Now Nufarm introduces Credit[®] 45 glyphosate. Its new and more concentrated formula is now registered for Roundup Ready[®] crops – and backed by a 60 minute rainfast guarantee.

Now registered for Roundup Ready[®] canola.

Credit 45 glyphosate can be used with Roundup Ready canola. It can be applied up to and including the 6-leaf stage of the canola crop. For optimum control, it should be sprayed when weeds are less than 25 cm tall.

New extra strength formula.

With Credit 45 growers can treat more acres with less glyphosate, thanks to a concentrated 450 gram/litre formulation. That means fewer cartons to carry. And less time and effort to fill a sprayer.

Credit 45 is also available in a 450 L shuttle.

Guaranteed rainfast within one hour.

Credit 45 can be confidently applied up to 60 minutes prior to rain – giving growers greater flexibility and extra peace of mind. Backed by Nufarm.

Rate Equivalency

Standard 356 g/L glyphosate	0.5 L/acre	1.0 L/acre	1.5 L/acre	2.0 L/acre
Credit 45 (450 g/L formula)	0.4 L/acre	0.8 L/acre	1.2 L/acre	1.6 L/acre
